All bulls must have documentation of a passed breeding soundness exam, including scrotal measurements within 30 days prior to sale. Minimum scrotal circumference measurements:

12-16 months old---- 32 cm  
17-23 months old---- 34 cm  
24+ months old----- 36 cm

Based on recognized industry standards for Bovine Breeding Soundness Examinations as set forth by the Society for Theriogenology I classify this bull as a satisfactory potential breeder. Bulls must meet minimum criteria in all areas.
